ANDRÉS LÓPEZ VALDERRAMA

Presidente Ejecutivo de Corferias

Las industrias del plástico, caucho, petroquímica, empaques y envases atraviesan una transformación profunda. Hoy, el sector enfrenta desafíos decisivos asociados a la economía circular, la neutralidad de carbono, la optimización de procesos y la adopción de tecnologías de manufactura avanzada. En este contexto, **ColombiaPlast 2026** regresa del 28 de septiembre al 2 de octubre a Corferias como la plataforma más representativa de Colombia, la región Andina, Centroamérica y el Caribe para generar negocios, compartir conocimiento y construir el futuro de la industria en Latinoamérica.

Esta XIII edición reafirma el posicionamiento internacional del evento. Organizada en alianza estratégica por **Acoplásticos, Messe Düsseldorf North America y Corferias**, la feria consolida a Bogotá como un punto estratégico para conectar a productores, transformadores, distribuidores y compradores de toda la región. Durante cinco días, más de 50.000 visitantes y una muestra representativa de 314 expositores —de los cuales 186 son internacionales— convertirán a Colombia en el epicentro de las soluciones tecnológicas en materias primas, maquinaria, instrumentación y soluciones para el sector del plástico, caucho, petroquímica, empaques y envases.

Bajo la premisa de impulsar una **producción sostenible e innovadora**, esta versión pone en el centro la eficiencia operativa y la transición hacia modelos de negocio circulares. Las cifras demuestran el peso estratégico de esta industria: en Colombia, las exportaciones del sector alcanzaron los USD \$778 millones en 2024, con un crecimiento constante en la adopción de materias primas e insumos de alta tecnología. En paralelo, las nuevas exigencias regulatorias y ambientales aceleran la demanda de materiales de menor densidad, biodegradabilidad y el aprovechamiento de resinas recicladas de alta calidad.

ColombiaPlast 2026 será también el escenario para analizar las grandes tendencias que marcan el rumbo industrial a través de su **Agenda Académica**: espacios especializados donde expertos abordan temáticas clave como el análisis de mercado y formulaciones en recubrimientos, la integración de resinas postconsumo (PCR), el control de calidad de insumos bajo la norma NTC 6632, la aplicación de fillers livianos funcionales, la biodegradabilidad de nueva generación y las soluciones avanzadas para el cierre de ciclo en empaques para alimentos. Estas dinámicas de transferencia de conocimiento están transformando directamente las decisiones de inversión y las estrategias de desarrollo técnico en toda la cadena de valor.

La feria integra además zonas de experiencia altamente especializadas como **GoPlastic**, enfocada en propuestas concretas de sostenibilidad industrial; **3DFEST**, diseñada para visibilizar la innovación, la producción y la competitividad 4.0; el espacio de **ALMACO**, dedicado a potenciar los materiales compuestos como alternativas sostenibles de alto valor; y la **Ruta Pintando Colombia** es una iniciativa

especializada que reúne a proveedores de materias primas, maquinaria, equipos, tecnologías, servicios y otras soluciones para la industria fabricante de pinturas y recubrimientos. . Estos escenarios, sumados a una rueda de negocios, organizada por ProColombia y Corferias, aseguran un ambiente propicio para conectar capacidades industriales con necesidades reales del mercado.

Más allá de una muestra comercial, ColombiaPlast es un espacio donde convergen tecnología, sostenibilidad y oportunidades reales de desarrollo industrial. Es el lugar donde empresarios, ingenieros, transformadores e inversionistas pueden identificar tendencias, fortalecer alianzas y descubrir soluciones que mejoren la competitividad regional.

Quiero expresar un especial agradecimiento a nuestros socios organizadores, **Acoplásticos y Messe Düsseldorf North America**, por su constante liderazgo, visión y confianza en esta plataforma. Esta alianza estratégica fortalece la proyección internacional del evento y posiciona a Colombia como un nodo de innovación e ingeniería sostenible en América Latina.

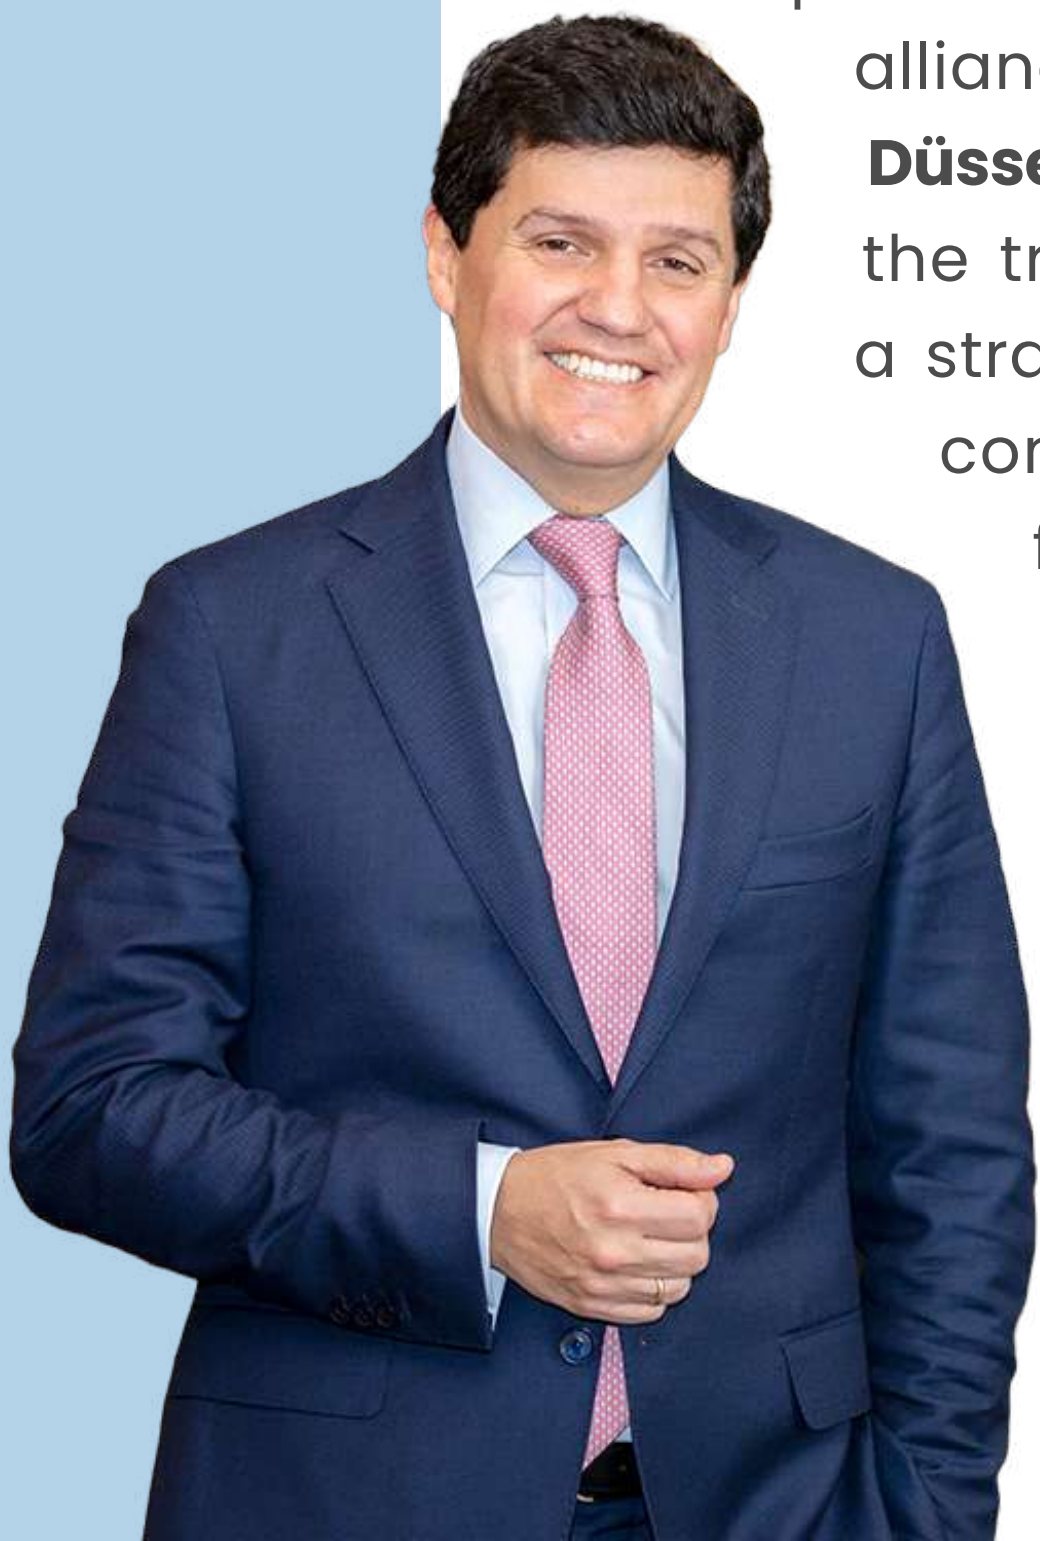

Sean todos bienvenidos a **ColombiaPlast 2026**, el punto de encuentro donde la sostenibilidad impulsa la innovación, la tecnología se transforma en competitividad y los negocios construyen el futuro industrial de nuestra región.

ANDRÉS LÓPEZ VALDERRAMA

Executive President of Corferias

The plastics, rubber, petrochemical, packaging, and container industries are undergoing a profound transformation. Today, the sector faces decisive challenges associated with circular economy, carbon neutrality, process optimization, and the adoption of advanced manufacturing technologies. In this context, **ColombiaPlast 2026** returns from September 28 to October 2 to Corferias as the most representative platform in Colombia, the Andean region, Central America, and the Caribbean to generate business, share knowledge, and build the future of the industry in Latin America.

This 13th edition reaffirms the event's international positioning. Organized through a strategic alliance between **Acoplásticos, Messe Düsseldorf North America, and Corferias**, the trade fair consolidates Bogotá as a strategic hub connecting producers, converters, distributors, and buyers from across the region. Over five days, more than 50,000 visitors and a representative showcase of 314 exhibitors —186 of whom are international— will make Colombia the epicenter of technological solutions in raw materials, machinery, instrumentation, and recycling solutions.

Under the premise of driving **sustainable and innovative production**, this edition focuses on operational efficiency and the transition toward circular business models. The numbers demonstrate the strategic weight of this industry: in Colombia, sector exports reached USD \$778 million in 2024, showing steady growth in the adoption of high-tech raw materials and inputs. In parallel, new regulatory and environmental demands accelerate the need for lower-density materials, biodegradability, and the utilization of high-quality recycled resins.

ColombiaPlast 2026 will also serve as the stage to analyze the major trends shaping the industrial landscape through its **Academic Program**: specialized spaces where experts address key topics such as coatings market analysis and formulations, the integration of post-consumer recycled (PCR) resins, quality control of input materials under the NTC 6632 standard, the application of lightweight functional fillers, next-generation biodegradability, and advanced solutions for closing the loop in food packaging. These knowledge-transfer dynamics are directly transforming investment decisions and technical development strategies across the entire value chain.

The trade fair also features highly specialized experience zones such as **GoPlastic**, focused on concrete industrial sustainability proposals; **3DFEST**, designed to highlight innovation, production, and Industry 4.0 competitiveness; the **ALMACO** space, dedicated to boosting composite materials as high-value sustainable alternatives; and the **“Ruta Pintando Colombia”** is a specialized initiative that brings together suppliers of raw materials, machinery, equipment, technologies, services, and other solutions for the paint and coatings

manufacturing industry.. These settings, combined with a business matchmaking event organized by ProColombia and Corferias, ensure an environment conducive to connecting industrial capabilities with real market needs.

Beyond a commercial showcase, ColombiaPlast is a space where technology, sustainability, and real industrial development opportunities converge. It is the place where business leaders, engineers, converters, and investors can identify trends, strengthen alliances, and discover solutions that enhance regional competitiveness.

I would like to express my special thanks to our co-organizing partners, **Acoplásticos and Messe Düsseldorf North America**, for their constant leadership, vision, and trust in this platform. This strategic alliance strengthens the event's international projection and positions Colombia as a hub for innovation and sustainable engineering in Latin America.

Welcome everyone to **ColombiaPlast 2026**, the meeting point where sustainability drives innovation, technology transforms into competitiveness, and business builds the industrial future of our region.

LA ENERGÍA DE SU EMPRESA

CONVERTIDA EN VENTAJA COMPETITIVA

En Bancóldex financiamos proyectos fotovoltaicos que impulsan el crecimiento y la competitividad de la industria colombiana.

PROPUESTA DE VALOR

01

Acompañamiento técnico

Apoyo en la estructuración y viabilidad técnica del proyecto, con aliados estratégicos especializados.

02

Costo fijo, beneficio tributario

Convierta el gasto en energía en una inversión de largo plazo vía leasing financiero, sin perder beneficios tributarios.

03

Mejor flujo de caja

Plazos largos que liberan capital de trabajo y aumentan su capacidad de pago.

04

Financiación a la medida

Leasing financiero o crédito directo corporativo, indexados a IBR, según el perfil de su empresa.

CONDICIONES DEL PROGRAMA

Beneficiarios

Micro, pequeñas, medianas y grandes empresas que estructuren e implementen proyectos de paneles **solares fotovoltaicos**.

Destino

Modernización: estructuración e implementación de paneles solares fotovoltaicos.

Hasta **15%** de la inversión puede dirigirse para la adecuación de obras civiles asociadas al proyecto.

Plazo

Hasta **10 años**, con período de gracia según las políticas de crédito directo de Bancóldex.

Acoplásticos

DANIEL MITCHELL RESTREPO

Presidente de Acoplásticos

ColombiaPlast se consolida como la feria líder de la región para los sectores industriales del plástico y el caucho

Desde su fundación en 1961, Acoplásticos ha realizado un trabajo permanente, en coordinación con sus empresas afiliadas, por la competitividad y el desarrollo sostenible de los sectores de plástico, petroquímica, química básica, pinturas, caucho, tintas y fibras. En el marco de este objetivo, se empezó a realizar, hace más de 20 años, la feria ColombiaPlast, la cual se ha ido posicionando como un referente en América Latina para las industrias del plástico y del caucho.

En 2021, Acoplásticos, el Centro Internacional de Negocios y Exposiciones de Bogotá – Corferias y Messe Düsseldorf, firmaron una alianza para la organización conjunta de ColombiaPlast.

Messe Düsseldorf es la organizadora de K Fair, la feria no.1 en el mundo para plásticos y caucho, que se celebra cada tres años en Düsseldorf, Alemania, y que, en su última versión, contó con cerca de 3.300 expositores de 66 países.

Es así como la experiencia de Messe Düsseldorf, en la organización de ferias para plásticos y caucho, junto con su extensa red de oficinas de ventas y sus filiales en 141 países, se unió como socio a Colombiaplast. La feria de 2026 será la tercera organizada colectivamente entre las tres organizaciones.

Esta alianza ha permitido que, por primera vez, una feria de Latinoamérica, como es ColombiaPlast, se integre a la cartera de ferias “Global Gate” para plásticos y caucho de Messe Düsseldorf, lo cual representa, para esta plataforma de negocios en el sector, abrir puertas con un potencial cubrimiento y acceso a prometedores mercados emergentes en Europa Central y Oriental, Oriente Medio, África del Norte, China, India y el Sudeste Asiático. Todo ello, con el fin de que los empresarios de Colombia, y de toda la región, tengan la posibilidad de conocer sobre los más recientes avances tecnológicos y las últimas tendencias de la industria.

Corferias, por su parte, es, para la industria ferial, un referente altamente especializado y de gran liderazgo en Latinoamérica. Con más de 65 años dedicados a la realización de este tipo de eventos, Corferias, como socio de Colombiaplast, aporta el respaldo y conocimiento, en el propósito de ratificar nuestra feria como la primera feria HUB del sector en la región. Estamos convencidos de que Colombiaplast se está posicionando como la feria comercial y de negocios líder de Plásticos y Caucho en América Latina.

Colombiaplast cubre una región con gran potencial y abarca unos sectores que tienen inmensos desafíos, por ejemplo, en sostenibilidad, transformación digital, internacionalización y desarrollo y aplicación de nuevos materiales.

En esta versión de 2026, vamos a tener una muestra comercial de cerca de 6.000 m2 con las últimas tendencias en maquinaria industrial, soluciones ambientales, industria 4.0., robótica, internet de las cosas, manufactura aditiva, economía circular, e innovación en materiales y compuestos. Tendremos, además, dos zonas de experiencia para emprendedores sobre economía circular e impresión en 3D, y la ruta “Pintando Colombia” con las últimas tendencias y novedades en equipos e insumos para la industria de la pinturas y recubrimientos similares. Además, la feria contará con una agenda académica completa y diversa, y una rueda de negocios internacional para empaques, envases, productos de hogar y aplicaciones de plásticos en la agricultura y la construcción sostenible.

Nuestro objetivo es afianzar el crecimiento, la internacionalización, modernización e internacionalización de las industrias del plástico y del caucho en la región y perfilar su desarrollo y modernización para los próximos años.

Queremos dar la bienvenida a proveedores y fabricantes de plásticos y caucho para que visiten la maravillosa ciudad de Bogotá y nos acompañen en la XII edición de ColombiaPlast, del 28 de septiembre al 2 de octubre de 2026.

Acoplásticos

DANIEL MITCHELL RESTREPO

Acoplásticos President

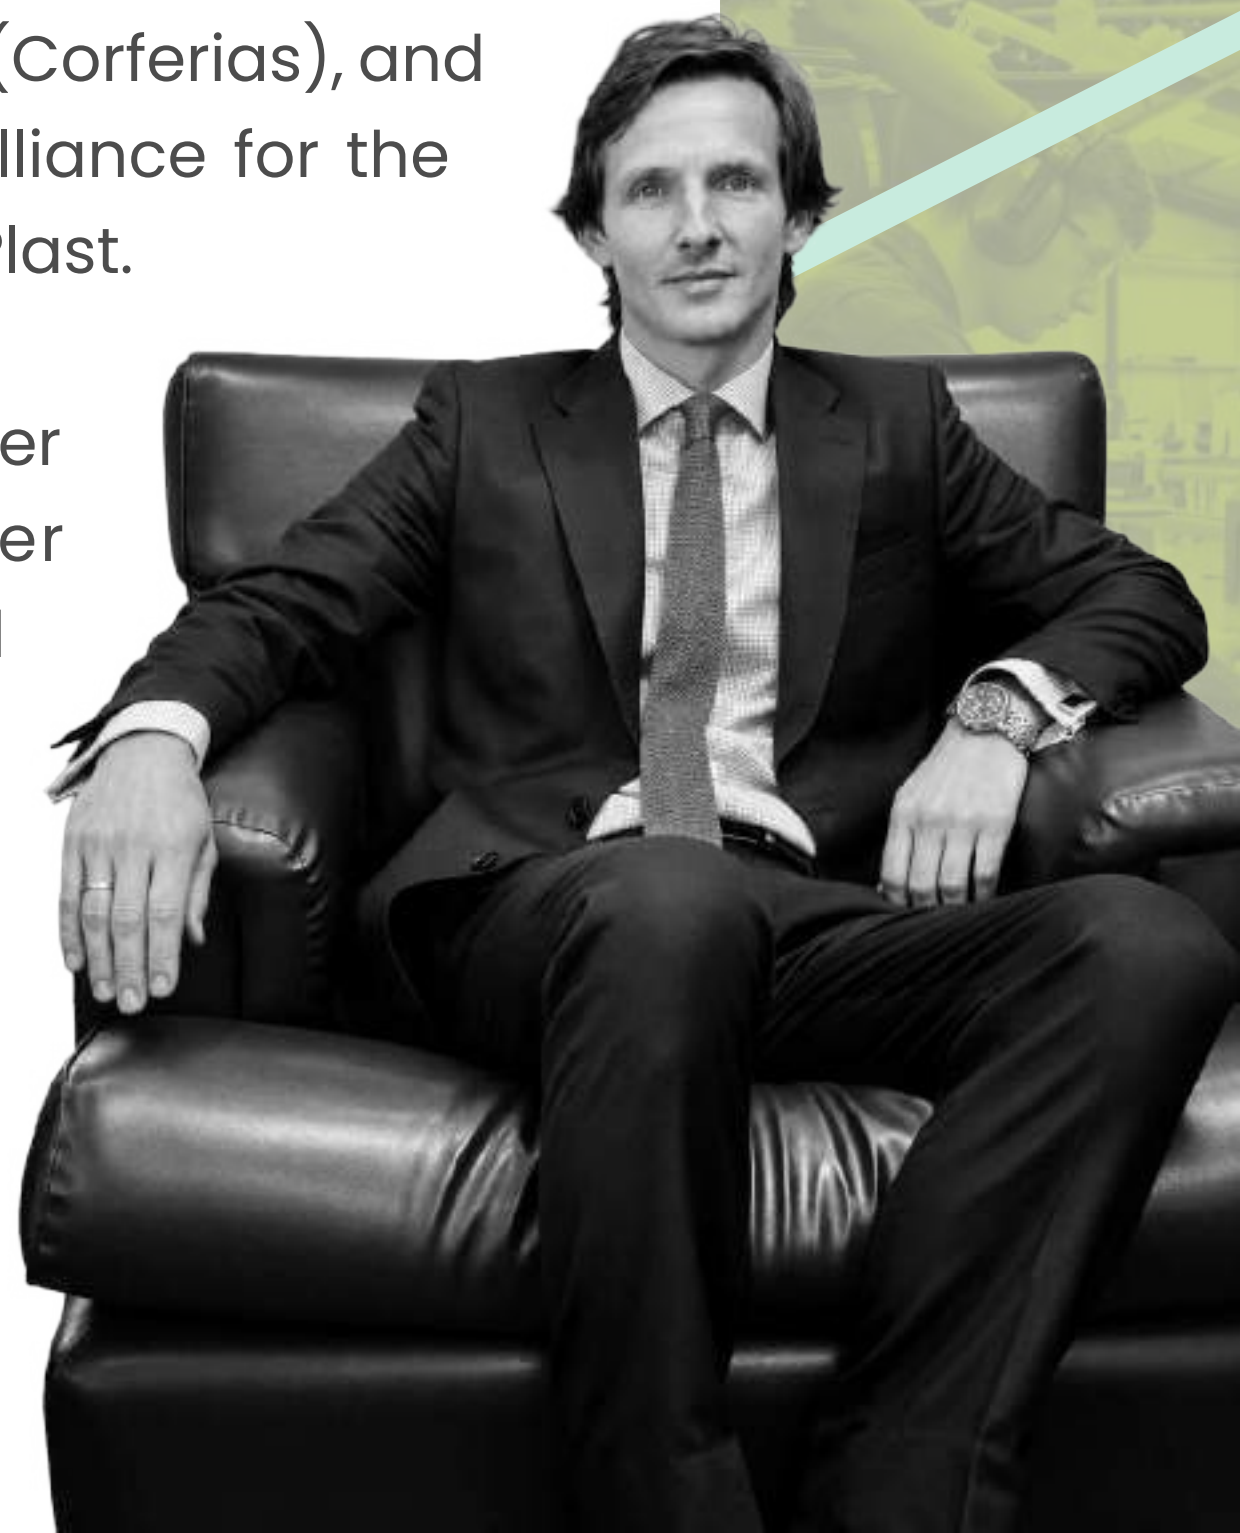

ColombiaPlast – the region's leading trade fair for the plastics and rubber industrial sectors

Since its founding in 1961, Acoplásticos has carried out ongoing work, in coordination with its member companies, for the competitiveness and sustainable development of the plastics, petrochemical, basic chemical, paints, rubber, inks, and fibers sectors. As part of this objective, more than 20 years ago the organization began holding the ColombiaPlast trade fair, which has steadily positioned itself as a benchmark event in Latin America for the plastics and rubber industries.

In 2021, Acoplásticos, the Bogotá International Business and Exhibition Center (Corferias), and Messe Düsseldorf signed an alliance for the joint organization of ColombiaPlast.

Messe Düsseldorf is the organizer of K Fair, the world's number one trade fair for plastics and rubber, held every three years in Düsseldorf, Germany, whose most recent edition featured close to 3,300 exhibitors from 66 countries.

Thus, Messe Düsseldorf's experience in organizing

plastics and rubber trade fairs, together with its extensive network of sales offices and subsidiaries in 141 countries, joined ColombiaPlast as a partner. The 2026 fair will be the third organized collectively by the three organizations.

This alliance has, for the first time, allowed a Latin American trade fair—ColombiaPlast—to join Messe Düsseldorf’s “Global Gate” portfolio of plastics and rubber trade fairs. For this business platform in the sector, this means opening doors with potential coverage and access to promising emerging markets in Central and Eastern Europe, the Middle East, North Africa, China, India, and Southeast Asia. All of this is aimed at giving business owners in Colombia, and throughout the region, the opportunity to learn about the industry’s most recent technological advances and latest trends.

Corferias, for its part, is a highly specialized benchmark and a major leader in the trade fair industry in Latin America. With more than 65 years dedicated to organizing this type of event, Corferias, as a ColombiaPlast partner, contributes the backing and expertise needed to affirm our fair as the region’s first HUB fair for the sector. We are convinced that ColombiaPlast is positioning itself as the leading commercial and business trade fair for plastics and rubber in Latin America.

ColombiaPlast covers a region with great potential and encompasses sectors that face immense challenges, for example in sustainability, digital transformation, internationalization, and the development and application of new materials.

In this 2026 edition, we will have a commercial exhibition of nearly 6,000 m² featuring the latest

trends in industrial machinery, environmental solutions, Industry 4.0, robotics, the internet of things, additive manufacturing, the circular economy, and innovation in materials and compounds. We will also have two experience zones for entrepreneurs focused on the circular economy and 3D printing, and the “Painting Colombia” route featuring the latest trends and developments in equipment and supplies for the paint and similar coatings industry. In addition, the fair will feature a full and diverse academic program and an international business matchmaking event for packaging, containers, household products, and plastics applications in agriculture and sustainable construction.

Our goal is to strengthen the growth, internationalization, and modernization of the plastics and rubber industries in the region, and to help shape their development and modernization for years to come.

We would like to welcome plastics and rubber suppliers and manufacturers to visit the wonderful city of Bogotá and join us for the 12th edition of ColombiaPlast, from September 28 to October 2, 2026.

Messe
Düsseldorf
North America

GEOFF SAUER

Presidente Messe Düsseldorf North America

Estimados visitantes y expositores,

En nombre de Messe Düsseldorf Norteamérica, la feria K en Düsseldorf y nuestro portafolio global de alianzas K de ferias comerciales de plásticos y caucho, me complace darles la bienvenida a ColombiaPlast 2026.

Nos enorgullece ser coorganizadores de esta dinámica exposición por la tercera vez. Nuestros clientes internacionales continúan reconociendo el fuerte potencial comercial dentro del mercado colombiano. Este año, nos complace dar la bienvenida a una sólida presencia de expositores provenientes de Europa, Estados Unidos, Brasil, México, India y China.

Colombia alberga una industria de plásticos, caucho, petroquímica, envases y empaques vibrante y de rápido crecimiento. El sector representa aproximadamente el 16 % del PIB manufacturero anual del país.

Como el tercer mercado más grande de América Latina, después de Brasil y México, y estratégicamente ubicado

como puerta de entrada a la región, Colombia ofrece oportunidades significativas para proveedores e inversores internacionales. Su entorno competitivo y la fuerte dependencia de las importaciones aumentan aún más su atractivo como destino de negocios.

Junto con nuestros socios, Corferias y Acoplásticos, estamos entusiasmados de reunir a profesionales de la industria de toda Colombia, América y el mundo para explorar las últimas tecnologías, innovaciones y soluciones especializadas en el sector. A través de su amplia exhibición de maquinaria avanzada y productos de vanguardia, junto con su programa de conferencias concurrentes, ColombiaPlast continúa siendo una plataforma líder para el desarrollo de negocios en Colombia y en los mercados de habla hispana del Hemisferio Occidental.

¡Gracias por ser parte de ColombiaPlast 2026! ¡Les deseo una semana exitosa, productiva y agradable aquí en Bogotá!

Messe
Düsseldorf
North America

GEOFF SAUER

President Messe Düsseldorf North America

Dear Visitors and Exhibitors,

On behalf of Messe Düsseldorf North America, the K trade show in Düsseldorf, and our global K Alliance portfolio of plastics and rubber trade fairs, I am delighted to welcome you to ColombiaPlast 2026.

We are proud to be co-organizers of this dynamic exhibition for the third time since 2022. Our international customers continue to recognize the strong business potential within the Colombian market. This year, we are pleased to welcome a robust exhibitor presence from Europe, the United States, Brazil, Mexico, India, and China.

Colombia is home to a vibrant and fast-growing plastics, rubber, petrochemical, container, and packaging industry. The sector represents approximately 16% of the country's annual manufacturing GDP. As the third-largest market in Latin America—following Brazil and Mexico—and strategically located as a gateway to the region, Colombia offers significant opportunities for international suppliers and investors. Its competitive environment and strong reliance on imports further enhance its appeal as a business destination.

Together with our partners, Corferias and Acoplásticos, we are excited to bring together industry professionals from across Colombia, the Americas, and around the globe to explore the latest technologies, innovations, and specialized solutions in the sector. Through its extensive showcase of advanced machinery and cutting-edge products, along with its concurrent conference program, ColombiaPlast continues to be a leading platform for business development in Colombia and throughout the Spanish-speaking markets of the Western Hemisphere.

Thank you for being part of ColombiaPlast 2026. I wish you a successful, productive, and enjoyable week here in Bogotá!

Productos y/o servicios / Products and Services: Eisebär, Z-Moulds® & Intravis. Eisebär, Z-Moulds® and intravis bring together complementary expertise across the plastics manufacturing process. Eisebär provides energy-efficient systems for material drying, dehumidification, cooling, crystallization, mixing and dosing. Z-Moulds® specializes in high-

PAB/HALL
11-16

cavity injection moulds and closure technology, delivering highest output, fastest cycle times and comprehensive product development expertise. Intravis develops intelligent vision inspection solutions for preforms, closures, bottles and labels, helping manufacturers detect defects, prevent quality issues and optimize production. Together, the three companies offer a connected approach to plastics processing — from material preparation and tooling to production and quality inspection. One partnership. three areas of expertise. a shared goal: better, more efficient and sustainable plastics production.

Productos y/o servicios / Products and Services: DKM is a brand under the sino group. The name DKM is derived from "discover key of molding", signifying a continuous exploration and discovery of the core and key technologies in injection molding. DKM is a technology - innovation - driven enterprise integrating R&D and manufacturing of high-end injection molding equipment. The company offers a complete range of injection molding machines, from all-electric models to two-platen machines, with clamping forces ranging from 90 tons to 6,000 tons. In recent years, DKM's global market share has been steadily increasing, establishing DKM as a renowned brand in the global injection molding industry.
